Moeskaer Beefmaster is our new young superstar.

He is sired by no other than the legendary TH Masterplan 183F, USA's number 1 sire. Masterplan has for several years been the most popular and heaviest used sire in the entire breed. He is producing exceptional offspring and he excels in so many traits.

He is siring both show winners and extremely functional offspring. He has extremely good numbers across the board with 80-90% accuracy.

Masterplan is siring offspring with low birth weights but they have explosive growth and great muscling. His birth weights are lower than breed average but his growth is the best of the breed. That's very unique.

Beefmaster's dam is a big powerful cow with loads of milk. She has raised fullsibs to Moeskaer Beefmaster that have set records for growth and have been high sellers at auctions.

Moeskaer Beefmaster has everything we are looking for in a beef bull:

- easy calving
- growth
- muscling
- low maintenance
- perfect feet and legs
- dark colour
- quiet temperament
- Super pedigree full of functional cattle

Semen by Moeskaer Beefmaster is expected to be available to most countries early 2026

In Denmark only a very few straws will be available
